

**Shared Decision Making Clinician Survey:** Again, we ask for your input on how the “Shared Decision Making in Primary Care” project is affecting your clinical practice. Please answer the following questions to complete this research project.

**I am an MD \_\_\_\_\_**

**NP/PA \_\_\_\_\_**

- 1) **Did your eligible patients watch the PSA Decision Aid (DA) over the last year?**  
 Some       Most       None       I don't know
  
- 2) **How do you know they are watching it?**  
 I ask them       They bring it up       Other \_\_\_\_\_
  
- 3) **Why are eligible patients not watching the DA? Check all that apply.**  
 Not interested       Patient already made PSA decision  
 No time       Did not receive DA  
 Prefers not to be a research participant       Other \_\_\_\_\_
  
- 4) **How does the use of the DA change the conversation about PSA screening during the visit?**

	Less		No change		More
Focus on knowledge and facts	1	2	3	4	5
Focus on what matters to the patient (values)	1	2	3	4	5
Focus on patient's concerns or worries	1	2	3	4	5
  
- 5) **How does the use of the DA affect the efficiency of the clinic visit?**       I don't know  

Takes more time		No effect (no difference)		Saves Time
1	2	3	4	5
  
- 6) **How useful was the PSA DA in helping you and your patient make a screening decision?**  

Not Useful	A little Useful	No Difference	Somewhat Useful	Very Useful
1	2	3	4	5
  
- 7) **How useful was the DA in helping you identify your patient's values regarding PSA screening?**  

Not Useful	A little Useful	No Difference	Somewhat Useful	Very Useful
1	2	3	4	5
  
- 8) **What is your overall satisfaction with the PSA DA as an adjunct to your usual counseling in clinic?**  

Very Dissatisfied		Neutral		Very Satisfied
1	2	3	4	5
  
- 9) **How do you think the use of the PSA DA affects the likelihood that you could be sued by a patient regarding the decision they made?**       I don't know  

No effect		Less Likely		More likely
1	2	3	4	5
  
- 10) **We will not longer be mailing PSA DA to all of our male patients aged 50-75. In the future, which ways do you think are best for getting the decision aid to the right patients? (Choose all that apply)**  
  - Mail DAs before physical exam appointments to men 50 years old or are new patients.

- Allow patients to choose if they want the DA, through the ISS/H-Quest questionnaire.
- Allow clinicians to order the PSA DA, as is being done now with chronic condition DAs.
- I prefer the PSA screening DA not be made available to my patients.
- Other: \_\_\_\_\_

**11) Please comment further on use of the PSA DA in your practice:**
