

## **Awarded from General Funds of the Hitchcock Foundation**

Erik Kobylarz, M.D., Department of Neurology, for “Feasibility Study of Wireless Neural Probes”

Lorenzo Sempere, Ph.D., Department of Medicine, for “Contextual Multi-Protein Signatures for Personalized Treatment in Breast Cancer”

Brad Duchaine, Ph.D., Department of Psychology and Brain Science for “Face Perception in Acquired Prosopagnosia”

Tracie Caller, M.D., Department of Neurology for “Epidemiology of ALS in Northern New England: A Possible Relationship to Environmental Toxins”

Radu Stan, M.D., Department of Pathology for “Plasmalemmal Vesicle Associated Protein (Plvap/PV1) as a Novel Target for Cancer Immunotherapy”

Aniko Fejes-Toth, Ph.D., Department of Physiology/Neurobiology for “Role of Mineralocorticoids in the Metabolic Syndrome and Obesity”

Susan Eszterhas, Ph.D., Department of Microbiology for “Development of a Pseudo-Virus Designed to Kill HIV-1 Infected Cells”

Michael Zegans, M.D., Department of Surgery for “Ocular Surface Microbiome of African Children With and Without Ocular Chlamydia Infection in a Trachoma-Endemic Area”

Lawrence Myers, Ph.D., Department of Biochemistry for “Are the Interactions Between Fungal-Specific Mediator Subunits Determinants of Virulence in the Human Fungal Pathogen, *Candida Albicans*?”

David Mullins, Ph.D., Department of Microbiology/Immunology for “G-Protein Coupled Receptors (GPCRs) and Melanoma Progression”

## **Student Research Awards**

Gilbert Rahme, DMS, Department of Genetics for “Studying The Role of Inhibitor of DNA Binding 4 (Id4) in Glioblastoma Multiforme Invasion”

Laura Bozzuto, DMS, Department of OB/GYN for “Preferences of OB/GYN Providers for Decision Aids in Clinical Practice”

Alison Peterson, DMS, Department of Psychiatry for “A Prospective Qualitative Investigation for Recovery Among Young Adults”

## **Awarded from The Hitchcock Foundation Scholar’s program**

Ryan Ratts, M.D., Department of Medicine, for “Purification, Identification, and Characterization of the Diphtheria Toxin Cytosolic Translocation Factor Complex.”

## **Schumann Lecture**

October 8, 2013

Lisa Schwartz, M.D. and Steven Woloshin, M.D.

Co-directors, Center for Medicine in the Media, Professor, Department of Medicine and Community and Family Medicine, Co-directors, VA Outcomes Group

“Before you take that pill . . . understanding the benefits and harms of prescription drugs”

## **Managed by the Foundation:**

- 37 active Hitchcock Foundation-sponsored research grants.

- 319 Advised Funds – Research and educational funds managed by the Foundation for departments, sections and individuals at Dartmouth-Hitchcock Medical Center.

•85 Sponsored Research Funds – Research funded from sources outside the Hitchcock Foundation; generally clinical studies or educational programs funded by pharmaceutical companies, medical equipment research and development companies or other corporate or foundation sources.

**Residents’ Revolving Loan Fund**

The Residents’ Revolving Loan Fund provides emergency loans to resident doctors while in training at DHMC.

- 12 outstanding loans
