Virtual Health Strategy for an Academic Medical Center  

Kristi Henderson, DNP, CFNP, CACNP, FAEN  

Description:  
This lecture will help members of the health care community understand how the University of Mississippi Medical Center (UMMC) successfully implemented a telehealth program, and which virtual health strategies are well suited for academic medical centers.  

At the end of this presentation, the participant will be able to:  
- Discuss the University of Mississippi Medical Center’s telehealth program  
- Review how telehealth can support critical access/community hospitals  
- Discuss telehealth’s role in “right-sizing” the health system  

Dr. Henderson is the Chief Telehealth & Innovation Officer for the University of Mississippi Medical Center (UMMC), where she is Director of the UMMC Center for Telehealth and holds dual appointments in the School of Medicine and School of Nursing. During her 20-year career as an administrator, educator, researcher and clinician she has focused on developing innovative approaches to transform the health care system. Dr. Henderson led the development of Mississippi’s statewide Telehealth Program, which is considered one of the nation’s finest. She has testified about telehealth before the U.S. Senate Committee on Commerce, Science, and Transportation and the White House Domestic Policy Council. A board member of the American Telemedicine Association and Executive Director of the Mississippi Telehealth Association, she was honored as the 2014 Nurse Innovator of the Year, and named a Robert Wood Johnson Nurse Executive Fellow in 2013 and Advanced Practice Nurse of the Year in 2012.
