

PROMPT Birthing Simulator offers a flexible system that integrates multiple training modules for a comprehensive and robust training experience.

Combining anatomical accuracy and features, which include a cervix and birth canal, PROMPT provides the ideal training solution for all skills relating to routine and difficult births. The PROMPT Birthing Simulator is ideal for addressing high risk, low frequency events and reducing complications. The versatile and modular design provide the user with a comprehensive experience in all stages of birth and complexity. Suited for all learners in both professional education and healthcare providers.
