

The Nasco Life/form Micro-Preemie Manikin simulates a 25-week neonate – the smallest, most realistically proportioned preterm infant available. The soft, entirely flexible body offers a variety of built-in features that make this a very lifelike and easy-to-use training aid for many commonly performed procedures including:

Airway, breathing, and ventilation, Chest tube, Cleaning and diaper changing, Delivery, GI, IV access, Monitoring, Neural tube defect (Myelomeningocele), Observation and measurement, Simulated breathing, Skin and wound care, Stoma care, Suction, Umbilicus with optional omphalocele, Various monitors, sensors, electrodes, etc., can be attached to the manikin wherever needed, and Ventilation.
