

Results Review is the fastest way to locate and review lab, pathology, or imaging results for your patient. Once you have selected the patient, click on **Results Review** action button. Click the **Use Date Range Wizard** button to:

Click the radio button next to “Data for Last 30 days”, “6 months” or “12 months” as your needs dictate then click **Accept**.

The Results Review activity opens with a “tree” view on the left and a table to the right. There are several helpful tools in this view, including the **Expand / Collapse** buttons above the tree, the **“Show Ref Rng”** button, and the **Legend** button. Try those out to see how they work.

By clicking on a topic or sub topic anywhere in the tree, you can generate a table view that is as broad or focused as you want. Clicking the value in any table Cell will bring up the appropriate details or results

The screenshot shows the D-Hconnect interface. On the left is a navigation tree with categories like LABORATORY RESULTS, RADIOLOGY, etc. The main area displays a table with columns for dates and times. A red text annotation "[Ellipses (...) link to reports]" points to an ellipsis in the table. To the right, a detailed report window is open, showing patient information and a surgical pathology report.

	4 9/7/2011 15:09	3 7/5/2012 15:47	2 11/6/2012 18:03	1 11/6/2012 18:06
PATHOLOGY				
Surgical Pathology...	
CYTOLOGY				
Gyn Cytology Final...				

Note: your initial display in Results Review will have 5 columns of the most recent data, not all the data included in the date range you have selected. Use the **Load More** or **Load All** buttons to bring more data into view:

This close-up screenshot highlights the 'Load All' and 'Load More' buttons in the interface toolbar, which are used to expand the data shown in the table view.
